PROFILE

Motivated Front-end Developer specialized in building responsive and dynamic web applications using React.js and modern   JavaScript (ES6+).

Skilled in component-based UI development, state management, and REST API integration.

Actively enhancing problem-solving skills and expanding knowledge in advanced React tools and libraries like Redux and Next.js through practical projects.

EMPLOYMENT HISTORY

Advanced Software Development in Full-Stack , Luminous Technical University College   Amman
Apr 2023 — Jun 2023

- Developed full-stack web applications using **React.js** for the front-end and **Node.js** for the back-end.
- Collaborated with a team to build a fitness tracking web app integrating **React.js**, **Node.js**, and **PostgreSQL**.
- Applied version control best practices using **Git** and **GitHub**, **ensuring an organized and version-controlled codebase.**
- Worked with RESTful **APIs**, data structures in **JSON**, and deployment tools like **Netlify** and **Render**.
- Used **MIRO** and collaborative tools to support Agile team planning and task tracking.

Technologies: React.js, Node.js, PostgreSQL, REST APIs, Git, GitHub, JSON, Netlify, Render, MIRO, Agile Collaboration
